How to find a course on ALMA?

The screenshot shows the ALMA website interface. At the top, there is a navigation bar with the University of Tübingen logo, a search bar, and a language selector set to 'English'. Below the navigation bar, there are tabs for 'Home', 'My Studies', 'Studies offered', 'Organisation', and 'Service'. The 'Studies offered' tab is selected, and a dropdown menu is open, showing options: 'Search for courses', 'Show current courses', 'Show university course catalog' (highlighted), 'Module descriptions', and 'Application'. A red arrow points to the 'Show university course catalog' option. Another red arrow points to the 'English' language selector. Below the navigation bar, there is a section titled 'Show university course catalog' with a 'Choose term' dropdown set to 'Winter 2026/2'. A red arrow points to the 'Show university course catalog' link. Below this, there is a list of courses under the heading 'General Linguistics / Computational Linguistics'. The first course is 'B.A. Allgemeine Sprachwissenschaft HF (Version 2016)'. A red arrow points to the '5 Faculty of Humanities → General Linguistics / Computational Linguistics' link. At the bottom, there is a footer with navigation icons.

Alternatively... Use My Studies/Planner of Studies with Module Plan to get an overview of your plan and easy access to the relevant courses.

The screenshot shows the 'Planner of Studies with Module Plan' for the Bachelor Computerlinguistik / Computational Linguistics (H-2016-1) program. The interface includes a top navigation bar with the university logo, a search bar, and a language selector set to English. Below the navigation bar, the title 'Planner of Studies with Module Plan Bachelor Computerlinguistik / Computational Linguistics (H-2016-1)' is displayed. A section for 'Show examination regulations' and 'Printview' is visible. The main content area features a table with columns for Semesters 1 through 8, showing the progression of courses and their credits. The table is organized into rows representing different course groups, with some cells containing course names and others showing credit values. The interface also includes a sidebar with navigation links and a bottom navigation bar with icons for various functions.

Details Page

The screenshot shows a web interface for course details. At the top is a navigation bar with links: Home, My Studies (active), Studies offered, Organisation, and Service. Below this is a breadcrumb trail: You are here: Home > My Studies > Planner of Studies with Module Plan. The main heading is 'Detail view'. A yellow banner displays 'Advanced programming | 900 | module'. Below the banner is a 'Back' button and a share icon. The 'Term planning' section contains several tabs: 'Module details', 'Lectures and examinations' (highlighted with a red box and a red arrow), 'Information about activity and allocation, assignment specific', 'University course catalog', and 'Courses of study'. The 'Lectures and examinations' tab is expanded, showing a 'Modules List' table. The table has three columns: Title, Number, and Actions. It lists four items: 'Advanced programming' (900), 'Seminar on data structures and algorithms for computational linguistics III' (910), 'Tutorial on data structures and algorithms for computational linguistics III' (915), and 'Courses: Advanced Programming' (ISCL-BA-07-H-16). Each item has an expandable icon and an action icon.
